

OBSERVATION AND SWIMMING WITH WHALE SHARKS

(only in the season from May 15th until September 15th)

This tour is a unique opportunity to swim with the largest fish on the planet.

Cancun is one of the few places on Earth where the giant whale sharks come during the season from May to September. Despite its size (some species reach 15 m in length) this fish is very calm and friendly. Its movement in the water is very slow and the food base consists of plankton and small fish. During the tour you can swim near the whale shark and watch it in its natural habitat.

Aside from the interaction with the giant fish you can snorkel in the coral reef near Isla Contoy. This place is ideal to enjoy the beauty of marine flora and fauna.
